PUMP CONTROL SYSTEMS

SYSTEM FEATURES

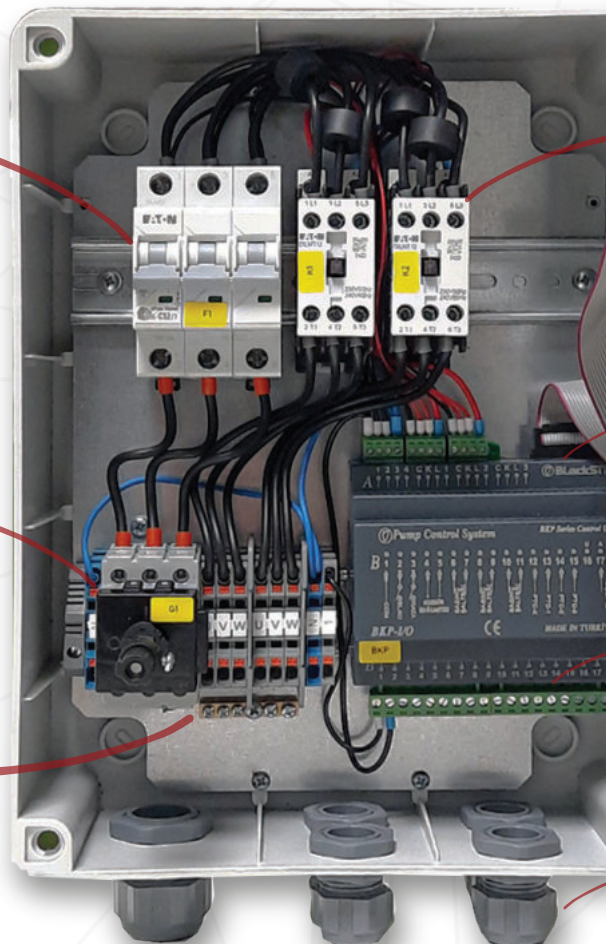

- Auto Test feature.
- 2x16 character blue screen LCD.
- Using with a pressure transmitter.
- Automatic reset in current faults.
- Automatic test solenoid valve output.
- Socialization based on actual runtime.
- To be able to use it as a waste water panel.
- Automatic and manual operation selection.
- Informing fault conditions with relay contact.
- To be able to see the pump currents on the screen.
- Password protection against unauthorized tampering.
- Ability to see date and time information on the screen.
- To be able to set the pump upper and lower current values.
- Ability to set the automatic reset waiting time and number.
- Ability to set the voltage protection upper and lower values.
- Protection against waterless operation with float or electrode.
- Pump ready circuit and monitoring the error status on the screen.
- Measuring 3 phase voltage values and seeing them on the screen.
- Working as long as you press the test button in manual operation.
- Set pressure value can be adjusted in use with pressure transmitter.
- Limiting the number of activation (switching) of the pumps per hour.
- Automatic calculation of pump current values with recognition mode.
- Failure record device memorizes the last 20 faults with date and time.
- Ability to see the pressure value on the screen when using a pressure transmitter.
